## Memorandum

**To:** Mayor, Town Council  
**From:** Rick Wixom  
**Date:** January 22, 2021  
**Re:** **January 27, 2021 Town Council Meeting  
Review of Capital Priorities**

---

Each year in late January the Council, department heads, and team members with specific budget responsibilities review the lists of upcoming capital priorities. These lists include projects, major equipment, personnel, consultants, RAP tax and public art. This review assists our departments in preparing department budget requests for the upcoming year and planning for short term projects and needs.

The management team has spent significant time reviewing these lists. As with the budget, we believe that bringing to the Council a more finalized document will allow the Council to more efficiently use your time to review the priorities and planned work.

Starting this year, we've modified the way the lists are organized. We previously used a one-year list, a two-to-five-year list, and an over five years list. We've noted in the past some inherent difficulties with that format and have made changes. We also heard last year suggestions from the Council to improve the organization of the document.

We've modified the lists this year as follows:

- Fiscal year 2022 (year one).  
This list includes projects that will be ready to implement as of the new fiscal year, have undergone design or engineering work, and have had costs estimated.
- Fiscal year 2023 (year two).  
Includes projects that we intend to move to the year one list next year. Costs may not be entirely known, and design/engineering may be included on the year one list.
- Fiscal year 2024 (year three).  
Includes projects under planning for implementation in the near future.
- Over three years.  
Includes project ideas which are not fully developed, engineered, or prioritized into the upcoming three years.
- And a list which includes ideas found in the general plan or master plans which are not yet developed into specific projects.

This format is used for all categories (projects, equipment, personnel, consultants, etc.)

Our intent with this change is to use the year one, two, and three lists to proactively manage projects and other needs from year to year. For instance, in the year one list you will find design/engineering work for projects that will be implemented in year two or year three. The Council will be able to utilize this format to consider funding needs not only for the upcoming year, but future years as well.

We've also made changes in the layout of the capital priorities, including notations on funding or financing, estimated costs, and budget accounts.

As the budget work for FY22 proceeds, we'll finalize cost estimates for year one projects, assemble department budget requests, and prepare information for the Council's review later this spring.
