This coming Wed. the 22nd at 3:00 the town will have a meeting to discuss the history center. You've probably heard that now that it is stripped it is riddled with termites and the general consensus is to tear it down and rebuild, hopefully using the historic lumber on the interior. This rebuild will enable better compliance with setbacks, etc. and we will have a new and better building. This is our last chance to lobby for exterior restrooms in the new design. This gift to the tourists will be paid for with tourist dollars and is badly needed in this part of town. It makes our 'walkable' Community more user friendly...and we will have fewer interruptions as we utilize our history center. I would love it if you could send an email to the council or, even better, attend and express your opinion. Thank you so much, Lila
