To Staff and Town Council Members

While you discuss the "rebuild" concept for the history and visitors center, I would ask that you consider Mr. Zambella's option to install kiosk-like structures and then present the community with the cost and pros and cons of each.

One of the Town's goals is to create a pedestrian-oriented town. The kiosk-like structures promote:

1. Incorporating outdoor seating and shade structures vs parking;
2. They will provide an immediate visual, pedestrian draw that can be updated throughout the year.
3. They can be accessed outside of normal working hours, thereby educating a larger group of individuals; and
4. They will assist in providing convenient, adequate and attractive public restrooms in Springdale.

Thank you for this consideration.

Trish Rioux
