To: Town of Springdale
From: Richard Levin
Historic Preservation Commission

Subject: History Center Project

Dear Mayor, Town Council, Citizens and Visitors

What an uncomfortable pleasure to be organizing and making decisions about this new community resource.

Personally it will be wonderful to follow the leadings of this body as to the decisions it makes for this public facility and its future programs.

On a professional level the goals and objectives set out by the town to reach this point need to be unconditionally followed. The consensus of the community at large and its appointed leaders have undertaken the History Center as an achievable goal to benefit Springdale and its guests. The objective is sound and the use of its primary funding source meets statue. The change in form, design and implementation that we are considering while open to suggestion will continue to be guided successfully by our elected leaders and their professional support staff. I applaud the comments and ideas to move forward. Please keep in mind that the professional team the Council and mayor employe will follow institutional design and development laws as part of the governance of this project. The placement of restrooms within institutional buildings will be thoughtfully approached and incorporated.

I would like to advance that as the project moves forward and a structure/facility is created we still need people like yourselves to take upon the responsibility of leadership and direction for the entire program. It's as simple as doing any one thing towards your volunteering to its fruition. One project completed, one goal finished, one hour or day of your time towards completing any small project that moves the entire theme forward. Please take your ideas and utilize them. We know that each of us has many ideas. Try not to suggest them for implementation into anyone else's hands. Move your ideas forward by your own actions. Bring your well thought out ideas and solutions in complete form.

Thank You,
Richard Levin
