Dear mayor and town council,

Reading the input we have so far, I can see opinions vary considerably. I would like to see the center rebuilt as per option 4. I know we all have our personal opinions, but I find it very exciting to think of what what could be created starting with a clean slate. While CRSA gave us a very good plan, they were bound by so many existing conditions that it was hard not to see a "tail wagging the dog" situation with the old building.

I see a lot of logic in having an open space inside without the interruption of restroom traffic, but perhaps we could get the architects to show some basic renderings of a plan with both inside and outside options. I understand inside restrooms are usually kept in better condition, but the argument for exterior restrooms does keep more wall space open for exhibits inside. Either way, I see a new building as a real long game gem for the town if it's done right.

Thanks for your consideration.

Kelly McKean
