Town Council,

As a prior town councilman for 10 years I would like each of you to seriously consider and deny the change in location of the history center.

I sat on the council when the town negotiated to acquire the property and building that was going to be a history center. We as a council supported this based on projections and designs that said it would work.

I sat on the council when the property adjacent to the George A. Barker park was available for purchase, and we the council acquired that property to EXPAND the park, not to make it available as a history center.

That property will serve the town people far into the future as a park.

It will serve none of us as well as a history center.

Please find somewhere else to put a history center, or give the idea up completely. Don't undermine the efforts of the council that was sitting when that valuable property was acquired.

Please include the above comments with information that the concerned public can see. Sorry that I am commenting so late but Kolob was where I was at when the package was posted.
