

TOWN OF SPRINGDALE

SEPTEMBER 2023

ESTD 1862

From Mayor Bruno

PLANNING FOR THE FUTURE

The Town of Springdale will have two open Town Council seats beginning in January of 2024. Three candidates are campaigning to take those two spots. All three are members of the Springdale Planning Commission, which means that we will need to backfill two spots on the Commission. We are now accepting applications to fill those spots.

The Planning Commission is responsible for reviewing new development, preparing, and updating the General Plan, and making recommendations to the Town Council on land use issues and regulations. Serving on the Commission is a great way for residents to have an impact on the future appearance of the Town as well as the implementation of ordinances that support our vision for the Town -- everything from lighting ordinances to approval (or not) of new transient lodging units.

The time commitment is predictable. There are two meetings per month. Work meetings are generally held on the first Wednesday of each month and run from 5 to 7 pm. Regular meetings (public hearings, etc.) are generally held on the third Wednesday of each month and occasionally run past 7 pm depending on the length of discussions of agenda items.

ASK A PLANNER: WHAT'S THE DEAL WITH FOOD TRUCKS?

The Community Development Department gets lots of questions from the community. Sometimes there are recurring themes in these questions. From time to time we will be publishing responses to common community questions in the "Ask a Planner" feature of the Newsletter.

Question: I saw a food truck in Town the other day. Aren't those prohibited?

Answer: Not anymore. Up until 2018 the Town did not allow food trucks. In that year the State Legislature passed a law which required all cities and towns to allow food trucks. As mandated by the new State law, the Town revised its ordinances to allow food trucks. Under the Town's current ordinances food trucks can do business in the Town, as long as they meet the requirements of the Town Code. The Town Code regulates food trucks to the extent allowed by the State. For example, food trucks can only operate on private property in the CC, VC, or AG zones, but not in the required setback areas. Food trucks can't operate in the public right-of-way. Food trucks can stay in one location for a maximum of three hours before they must move to another location at least 300 feet from the prior location. Only one food truck can be in operation on a commercial property at any time. Food trucks can't block access to driveways, parking areas, pedestrian pathways, etc. If there is a permitted event at the Town Park (like a festival) food trucks are allowed as a part of that event.

If you have additional questions about food trucks (or any other planning related topics) please reach out to the Community Development Department at 435-522-4130. We are here to answer your questions and support the community. Thank you!

ACCESSORY DWELLING UNITS: WHAT ARE YOUR SUGGESTIONS?

Accessory Dwelling Units (ADUs) are becoming more popular and prevalent across the country as one solution to housing affordability. An ADU is a second living quarters on a single family residential property. An ADU is different from a guesthouse or a casita. The former is permanently occupied, while the latter is used occasionally by guests of the main residence. An ADU can be internal (meaning it is completely contained within the same structure as the primary dwelling) or external (meaning it is in a structure that is physically separate from the primary dwelling).

The Town currently allows internal ADUs in the Valley and Foothill Residential zones. External ADUs are only allowed in the Valley Residential zone. The Town currently only allows one ADU per property. Complete details about the Town's current ADU regulations are available in section 10-22-9 of the Town Code.

The Planning Commission is considering making changes to the regulations for ADUs. Specifically, the Commission is researching allowing external ADUs in the Foothill Residential zone. The Commission is also evaluating whether more than one ADU per property should be allowed. Various other associated revisions to ADU regulations are also being considered.

The Planning Commission wants your feedback and input. What do you think about ADUs? Should external ADUs be allowed in FR? Should more than one ADU be allowed per property? Are there other changes to ADU regulations that should be considered?

Please let us know what you think. Send your comments and suggestions regarding ADUs to Thomas Dansie at tdansie@springdale.utah.gov. If you would like to learn more about the Town's current ADU regulations, please contact Thomas Dansie at the Town Hall (435-522-4130).

SPRINGDALE – STARLIT 24-7

In case you missed it, Springdale is now designated as an International Dark Sky Community. This designation represents quite a bit of work and would not have been possible without substantial support and help from the community. Thank you for your efforts to preserve dark skies in the Town. To keep our Dark Sky Community designation, we have to maintain current progress and work to implement continuous improvement in night sky preservation.

As part of the certification process, Springdale's Town Code Title 10 Chapter 15C – Outdoor Lighting was heavily scrutinized and, with minor modifications, approved by the International Dark Sky Association. Town Code is the minimum standard required to maintain International Dark Sky certification and requires annual demonstration by the Town showing compliance or substantial improvement working toward compliance.

To ensure the Town maintains Dark Sky designation, property owners should review the Code and audit their current lighting to make sure it complies. As a courtesy, the Town will be conducting a Town-wide light audit and will begin educating and working with property owners to bring properties into Town Code compliance. Unfortunately, some light fixtures marketed and advertised as "dark sky compliant" do not meet the specific requirements of Springdale's Town Code. In some cases, these lighting fixtures emit lighting above the horizontal. Please review your outdoor lighting to make sure it complies with the Town's Code. If you have questions about the Town's outdoor lighting standards and your lighting fixtures, please contact the Community Development Department at 435-522-4130.

PLANNING FOR THE FUTURE

(continued from page 1)

The Planning Commission meetings are held in the Canyon Community Center at 126 Lion Boulevard in Springdale.

Packets are delivered to Commissioners on the Friday prior to the meeting. Each item includes a staff report with all of the relevant information for the agenda items. For example, a staff report would address whether an application complies with setbacks, height limits, landscape requirements, lighting compliance, and screening. Letters from community members often arrive up to the day of the meeting and should be read prior to the meeting.

Planning Commissioners must be full-time residents of Springdale. No prior experience with land use regulations is required, and training is provided. New members are "alternate commissioners," which means they participate fully in discussions but don't vote unless one of the five voting members is absent. This provides some time for training prior to becoming a full voting member.

If you are interested in applying for the Commission, please contact Aren Emerson (aemerson@springdale.utah.gov) and she will provide you with an application. Feel free to contact me or Kyla Topham, Planning Commission Chair (ktopham@springdale.utah.gov) with questions.

Thanks for your consideration.

COMMUNITY EMERGENCY RESPONSE TEAM (CERT)

Community Emergency Response Teams (CERT) are activated when local entities call us in or when local police and fire personnel are busy with more immediate needs in the community. The CERT concept was developed after a major earthquake in Mexico City, where people were injured or killed trying to help other people. Training on how to help, yet stay safe could have prevented rescuer injuries and saved lives.

It is a rewarding way to be of service to your community when the need is greatest.

CERT Training will be offered early next year. It is 12 hours of online work from home and 16 hours of in-person training and certification. We cover first aid, fire suppression, light search and rescue, disaster preparedness, medical operations, psychology, and team organization.

The CERT program educates people about disaster preparedness and trains them in basic disaster response.

Online CERT is developed to provide the FEMA-standardized 2019 curriculum to learners across the United States, meeting the lecture portion of the CERT training requirements. Once completed, you just follow up with your local CERT Coordinator to complete the hands-on practical portion and receive your full CERT credentials.

Hybrid CERT is partnered with the National CERT Association and Utah Division of Emergency Management.

If you are interested or have questions, please call Megan Honer-Orton at (435) 772-3393.
