My wife and I moved to Utah from Florida 8 years ago because we fell in love with Springdale after a visit in 2014.

I have a degree in Economics from Eckerd College and a Master's in Business Administration from the University of Florida. I spent my 43 year working career as a problem-solver; first evaluating and recommending profitability and financial strategies to expand business opportunities to upper management. Then later, resolving critical software problems by designing and implementing solutions to minimize software outages for our thousands of corporate users.

Now retired, I've been on the Planning Commission for 5 years (2 as Chair) focusing my problem-solving skills toward protecting the Town's unique character and village feel while safeguarding our natural resources. As a member of the Transient Lodging Task Force, I helped design strategies to prevent the continued conversion of residential properties into nightly rental. This Task Force also devised methods to ensure future development will be more closely aligned with what Springdale residents want. As a member of the Housing Committee, I have advocated for responsible workforce housing, while preserving our village environment.

I want to continue representing your interests while serving the Town....
